GSM Access Control

GSM T20 & T1000

Product Information Sheet

T20 and T1000 GSM Access Control system allows Caller ID control of doors, shutters, barriers and road blocks.

Program via USB, SMS or data call

Plug the unit into your PC, make a data call or send SMS programming texts for easy versatile programming.

Remote Control

Open gates from anywhere with a quick phone call that the system does not answer. Once the Caller ID has been matched the relay pulses. If the Caller ID not known then the call is simply ignored.

Outputs to signal alerts

The system allows inputs to be connected to it to generate text messages to the administrators mobile phone. Alerts can be forced gates, infrared beams blocked or even connected to an intruder alarm system.
