

# GSM Access Control

## GSM T1000

Jun  
2010

GSM-T1000 Access Control system allows Caller ID control of gates, doors, shutters, barriers and road blocks.

**Programming** - via USB, SMS or data call, simply plug the unit into your PC, make a data call or send SMS programming texts for easy versatile programming.

**Remote Control** from anywhere by a quick phone call that the system does not answer. Once the Caller ID has been matched the relay pulses. If the Caller ID not known then the call is simply ignored.

**Inputs to signal alerts** allows inputs to be connected to it to generate text messages to an administrators mobile phone. Alerts could be forced gates, blocked infrared beams or even connection to an intruder alarm system output.
