

GSM-EAGLE(Pro) Access Control has been developed to control gates, doors, barriers, road blocks using the Caller ID and shutter & garage doors by text message.

When a call is received, the call is dropped on the first ring and then if the users phone number is known, the relevant relay is pulsed.

Auto Learn - Caller ID's are stored against one or both relays automatically.

Easy programming - via text messages.

Remote Control - with a quick FREE phone call that is never answered. If Caller ID is matched the relay pulses otherwise the call is ignored.

SMS control - one or both the relays can be overridden by sending a quick message, ideal for lights or heating control. Garage and shutter mode by sending the word 'open' or 'close' by text from an authorised number.

Door Mode - the unit will only respond to a text message 'open' or 'close' and ignore any calls received.

Notifications - text messages of all attempts to access, failed attempts or can be switched off completely.

HomeSafe - text message are sent to inform tagged numbers have used the system to confirm family members or employees are home safe or have arrived in work.

User barring - block users and receive text messages showing an attempt that they have tried to access your premises.

Features

- Up to 4000 users
- Auto learn facility
- Gate operation counter & SMS
- Beam block detected notify
- Alarm inputs
- Shutter / garage secure mode
- Emergency override (Fire)
- Home safe notify
- User suspend & notify on attempt
- No call costs to operate
- Easy programming
- Pay As you Go SIM card included
- Qualifies for £3 per month SIM Card

Specification

- 12 to 36 Volts AC or DC
- 2 Relay outputs from 1s to 18h
- 2 Inputs
- 2 Year Warranty
- Dual & Quad band
- 115 x 75 x 50mm

Applications

- Gates & Barriers
- Doors & Shutters
- Garages & Road blocks
- Heating & Air conditioning
- Remote control
